**RIFLE CAMP PARK SHOULD REMAIN A
NATURAL OASIS, NOT A DISC GOLF COURSE**
Our Passaic County Freeholders are planning to
install an 18 hole tournament-level Disc Golf course
at Rifle Camp Park in the very near future.

**DISC GOLF IS AN ACTIVE SPORT, NOT
COMPATIBLE WITH PASSIVE HIKING & BIRDING**
Disc Golf is NOT compatible with passive
recreation activities. The discs used for this sport
are made of hard, heavy plastic and can travel at
high speeds. This will make the park unsafe for
hikers, birders, fitness walkers, and other visitors.
Installing a disc golf course in this park is inconsis-
tent with the goals in the County Parks,
Recreation & Open Space Master Plan, and it
directly contradicts the needs of residents reflected in
the Master Plan. This project will take the park away
from the many people that regularly use the park,
and hand it over to a single special interest group.

DISC GOLF IS HARD ON THE ENVIRONMENT
The disc golf course will have a highly
detrimental impact on the environment. The plan
involves cutting down over 100 trees for 18 acres of
fairways that would run throughout the entire park.
Rifle Camp Park is a part of the Audubon Garret
Mountain IBA (Important Bird Area). The disc golf
course will destroy important habitat and damage an
already fragile eco-system for years to come. This
unique habitat is a vital migratory stopover site for a
variety of birds, and supports threatened species
such as the red-headed woodpecker. It is not an
appropriate location for this particular recreational
activity. The public only became aware of this issue
recently, even though plans for the course have been
underway since 2016. No environmental impact
studies have been done.
No “Green Acres” public hearing has been
allowed, thus keeping public input to a minimum.

The SAVE RIFLE CAMP PARK COALITION
was forged from community members and
environmentally-minded organizations who gathered
together to protect our treasured park.
We are your neighbors, your friends; concerned
citizens brought together by an urgent call.
